

MODEL SME-2520/2521

TERMINAL CUM SWITCH BOX/ JUNCTION BOX

MODEL SME-2521/2520

FEATURES

- * Robust Construction
- * Water tight
- * Light weight
- * Easy installation

DESCRIPTION

Terminal cum switch boxes are used to terminate sensor cables in the junction box. Any sensor can be connected to a digital indicator/ readout unit through a selector switch to see the data. It is available in heavy ABS plastic material of different sizes to suit the requirement. It is also available in a steel body.

The junction boxes are used to avoid laying & protecting a number of cables of sensors up to the control room. In a junction box, numbers of cables are joined with a multi-core single cable. It is a hermetically sealed and rust-proof.
